

DETAILED CONTENTS

Preface	xvii
Acknowledgments	xxi
PART I: INTRODUCTION TO TEACHING AND LEARNING MATHEMATICS	1
1. Introduction to the Field of Mathematics Education	3
A Brief History of NCTM Standards	3
<i>Curriculum and Evaluation Standards</i>	4
<i>Professional Standards for Teaching Mathematics</i>	4
<i>Assessment Standards for School Mathematics</i>	5
<i>Principles and Standards for School Mathematics</i>	5
Understanding the Principles and Process Standards	6
<i>NCTM Principles</i>	6
<i>NCTM Process Standards</i>	8
Common Core State Standards	10
<i>CCSS Standards for Mathematical Practice</i>	10
<i>CCSS Content Standards</i>	11
A Global Perspective on Mathematics Education	12
Teaching <i>Through</i> Problem Solving: The Centerpiece of Reform-Oriented Instruction	15
First Steps in Beginning to Teach Through Problem-Solving	18
Conclusion	19
Vocabulary List	19
Homework Tasks	19
Clinical Task	20
Vignette Analysis Activity: Focus on Making Sense of Problems and Persevering in Solving Them (CCSS Standard for Mathematical Practice 1)	21
Resources to Explore	24
2. Key Psychological Ideas and Research Findings in Mathematics Education	27
What Should Teachers Expect to Learn From Research?	27
The Influence of Piaget and Vygotsky	29
Psychological Ideas Foregrounding the Individual	30
<i>The Cognitive Domain</i>	31
Conceptual and Procedural Knowledge	31
Instrumental and Relational Understanding	32
Constructivism	33

Transfer	34
Metacognition	35
<i>The Affective Domain</i>	36
Beliefs	36
Attitudes and Emotions	36
Mathematics Anxiety	36
Psychological Ideas Foregrounding the Social Environment	37
<i>Univocal and Dialogic Discourse</i>	37
<i>Social Norms</i>	38
<i>Sociomathematical Norms</i>	38
<i>Social Constructivism</i>	38
<i>The Zone of Proximal Development</i>	39
Research That Challenges Common Assumptions	
About Mathematics Education	39
<i>Assumption 1: Procedures Must Be Taught Before Students Do Applied Mathematics</i>	40
<i>Assumption 2: Teaching For Relational Understanding Is Too Time-Consuming</i>	41
<i>Assumption 3: Students Learn Best When Tracked Into Same-Ability Groups</i>	43
<i>Assumption 4: Extrinsic Rewards Support the Learning Process</i>	43
Teachers as Researchers	44
Conclusion	46
Vocabulary List	47
Homework Tasks	47
Clinical Tasks	48
Vignette Analysis Activity: Focus on Reasoning Abstractly and Quantitatively (CCSS Standard For Mathematical Practice 2)	48
Resources to Explore	51

3. Planning Mathematics Lessons

53

The Four-Column Lesson Planning Model	53
A Quality Control Framework for Planning Lessons	54
<i>Eliciting and Addressing Students' Preconceptions</i>	54
<i>Building Conceptual and Procedural Knowledge</i>	55
<i>Supporting Metacognition</i>	56
Alternatives to the Four-Column Lesson Plan Model	56
Ideas for Differentiating Instruction: Open Questions and Parallel Tasks	57
A "Top-10" List of Teaching Strategies And Tools	58
<i>Reading Strategies</i>	59
<i>Writing Strategies</i>	60
<i>Manipulatives Usage</i>	61
<i>Calculator Usage</i>	62
<i>Cooperative Learning</i>	63
<i>Encouraging Student-Invented Strategies</i>	64
<i>Having Students Pose Problems</i>	65
<i>Lecture and Note Taking</i>	66
<i>Metaphor</i>	68
<i>Games</i>	68

Avoiding Counterproductive Teaching Strategies	69
Conclusion	70
Vocabulary List	70
Homework Tasks	71
Clinical Tasks	72
Vignette Analysis Activity: Focus on Constructing Viable Arguments and Critiquing the Reasoning of Others (CCSS Standard for Mathematical Practice 3)	72
Resources to Explore	74

4. Mathematics Curriculum Models and Techniques

77

Recent Influential Curriculum Documents	77
<i>Political Context</i>	77
<i>NCTM Curriculum Focal Points</i>	78
Grade 6 Focal Points	78
Grade 7 Focal Points	79
Grade 8 Focal Points	79
<i>NCTM's Focus in High School Mathematics</i>	80
Number and Measurement	80
Algebraic Symbols	81
Functions	81
Geometry	82
Statistics and Probability	82
Curricular Techniques in Mathematics	83
<i>Use of Real-World Contexts</i>	84
<i>Teaching Through Problem Solving</i>	85
<i>Thematic Units</i>	87
<i>Integration of Content Strands</i>	88
<i>Guided Investigation</i>	90
<i>Progressive Formalization</i>	91
Technology Connection: Computer-Assisted Individualized Instruction	93
<i>Drill and Practice</i>	94
<i>Teaching for Social Justice</i>	95
<i>Summary</i>	97
Choosing Curriculum Materials	97
<i>Criteria for Examining Curricular Content</i>	98
<i>Examining Effects on Student Learning</i>	99
Conclusion	100
Vocabulary List	101
Homework Tasks	101
Clinical Tasks	102
Vignette Analysis Activity: Focus on Using Appropriate Tools Strategically (CCSS Standard for Mathematical Practice 5)	103
Resources to Explore	106

5. Implementing and Assessing Mathematics

Lessons and Curricula

107

Implementing NSF-Funded Curricula: Insights From Research	107
<i>Implementing CPMP</i>	108

<i>Implementing CMP</i>	108
Implementing NSF-Funded Curricula: Insights From Practice	110
<i>Implementing MiC</i>	110
<i>Implementing Math Thematics</i>	110
The Road to Implementing Reform-Oriented Curricula	111
<i>Learning From Curriculum Materials</i>	111
<i>Reconceptualizing the Teacher's Role</i>	111
<i>Long-Term Planning and Backward Design</i>	112
Teaching in a School Context Lacking a Reform-Oriented Curriculum	112
<i>Level of Cognitive Demand</i>	113
<i>Maintaining the Level of Cognitive Demand</i>	114
Formative and Summative Assessment Strategies	115
<i>Posing Higher-Order Classroom Questions and Discussion Prompts</i>	115
Technology Connection: Classroom Response Systems	117
<i>Monitoring and Steering Classroom Discourse</i>	118
<i>Observing Students at Work</i>	118
<i>Rubrics</i>	118
<i>Portfolios</i>	120
<i>Homework Assignments</i>	120
Conclusion	121
Vocabulary List	122
Homework Tasks	122
Clinical Tasks	123
Vignette Analysis Activity: Focus on Attending to Precision (CCSS Standard for Mathematical Practice 6)	123
Resources to Explore	126

6. Becoming a Professional Mathematics Teacher

129

Forming Professional Relationships	130
<i>Relationships With Students</i>	130
Organization of Class Work and Establishing Routines	130
Idea for Differentiating Instruction: Keeping All Students Engaged	132
Managing Classroom Discussions	132
Technology Connection: Introducing a Class to a New Piece of Technology	133
Classroom Discipline	134
Motivating Students	136
Assessing Students' Work	138
Response to Intervention (RTI) Programs	139
The Individualized Education Plan (IEP)	139
Moral Dimensions of Relationships With Students	140
<i>Relationships With Parents</i>	141
<i>Relationships With Mentor Teachers and Other Teachers</i>	141
<i>Relationships With University Supervisors</i>	142
Engaging in Ongoing Professional Development	143
<i>Professional Development Through Universities</i>	143
<i>Professional Development Situated in Practice</i>	144
<i>Professional Development Through Conferences</i>	144

Participating in Professional Organizations	145
Conclusion	145
Vocabulary List	146
Homework Tasks	146
Clinical Tasks	147
Vignette Analysis Activity: Focus on Classroom Management	148
Resources to Explore	151

**PART II: DEVELOPING AND TEACHING
MATHEMATICAL THINKING**

153

7. Developing Students' Thinking in Number and Operations

155

What Is Numerical Thinking?	155
Algorithmic Thinking	156
<i>Advantages of Algorithms</i>	156
<i>Pedagogical Difficulties With Algorithms</i>	156
<i>Connecting Algorithms to Previous Knowledge</i>	157
Idea for Differentiating Instruction: Encouraging Student-Generated Algorithms	158
<i>Alternative Algorithms</i>	158
<i>Order of Operations</i>	159
Number Sense and Estimation	160
<i>Number Sense</i>	160
<i>Computational Estimation</i>	161
<i>Measurement Estimation</i>	162
Proportional Reasoning	163
<i>Operations With Rational Number Representations</i>	163
<i>Suggestions for Teaching Operations With Fractions</i>	164
<i>Additional Aspects of Proportional Reasoning</i>	167
Generalizing Arithmetic	167
<i>Analyzing Number Sentences</i>	168
<i>Analyzing Numerical Sequences</i>	169
Idea for Differentiating Instruction: Polygonal Numbers	169
<i>Mathematical Integrity of Sequence Tasks</i>	170
Number Systems and Number Theory	171
<i>Factors and Multiples</i>	171
<i>The Fundamental Theorem of Arithmetic</i>	171
<i>Divisibility</i>	172
<i>Odd and Even Numbers</i>	172
<i>Prime Numbers</i>	173
<i>Irrational Numbers</i>	173
<i>Negative Numbers</i>	175
Technology Connection: Operations on Integers	
With Virtual Manipulatives	176
<i>Complex Numbers</i>	177
Understanding Vectors and Matrices	177
<i>Vectors</i>	178
<i>Matrices</i>	179
Combinatorial Thinking	181

<i>The Fundamental Counting Principle</i>	181
<i>Selection, Partition, and Distribution Problems</i>	182
<i>Sequencing Combinatorics Problems</i>	183
<i>Verifying Results of Computations</i>	183
Conclusion	184
Vocabulary List	184
Homework Tasks	185
Clinical Tasks	187
Vignette Analysis Activity: Focus on Modeling With Mathematics (CCSS Standard for Mathematical Practice 4)	190
Resources to Explore	192
Four-Column Lesson Plans to Help Develop Students' Numerical Thinking	194

8. Developing Students' Algebraic Thinking **203**

What Is Algebraic Thinking?	204
Understanding Algebraic Symbols and Conventions	205
<i>Interpreting Literal Symbols</i>	205
<i>Translating Between Words and Algebraic Symbols</i>	207
<i>Arithmetic-Associated Difficulties</i>	210
Understanding and Executing Algebraic Procedures	210
<i>Equal Sign Understanding and Solving Equations</i>	210
<i>Transition From Solving Equations to Solving Inequalities</i>	213
Idea for Differentiating Instruction: Comparing Multiple Strategies for Solving Inequalities	214
<i>Simplifying Expressions</i>	215
<i>Factoring and Multiplying Polynomials</i>	218
Technology Connection: Computer Algebra Systems	220
Understanding Functions	221
<i>Reification Theory</i>	222
Technology Connection: Analyzing Multiple Representations	223
<i>The Cartesian Connection</i>	225
Technology Connection: Parabolic Area Functions	226
<i>Creating Meaning From Context</i>	227
<i>Finding Patterns and Making Generalizations</i>	229
Idea for Differentiating Instruction: Toothpick Towers	231
<i>Understanding Slope</i>	232
Technology Connection: The Slope Game	233
Technology Connection: Data Collection Devices	234
<i>Building a Concept Image for Function</i>	235
Conclusion	237
Vocabulary List	237
Homework Tasks	238
Clinical Tasks	239
Vignette Analysis Activity: Focus on Looking For and Expressing Regularity in Repeated Reasoning (CCSS Standard for Mathematical Practice 8)	242
Resources to Explore	244
Four-Column Lesson Plans to Help Develop Students' Algebraic Thinking	246

9. Developing Students' Statistical and Probabilistic Thinking **253**

- What Are Statistical and Probabilistic Thinking? 253
 - Statistical Thinking Elements* 254
 - Statistical Literacy 254
 - Statistical Thinking 255
 - Statistical Reasoning 255
 - Elements of Probabilistic Thinking* 257
 - Frequentist Probability 257
 - Classical Probability 258
 - Subjective Probability 259
- Statistical Study Design 260
 - Formulating Questions* 260
 - Drawing Samples* 261
- Understanding and Using Descriptive Statistical Tools 263
 - Data Displays* 263
- Technology Connection: Dynamic Statistics Software 267
 - Transnumeration* 268
- Technology Connection: Informal Representations
 - With Dynamic Statistics Software 269
 - Averages* 270
- Idea for Differentiating Instruction: Repeated Measures Task 273
 - Descriptive Statistics Beyond Averages* 274
 - Procedural Knowledge Issues* 274
- Making Probabilistic Inferences 277
 - Misconceptions About Conditional Probability* 277
- Idea for Differentiated Instruction: Parallel Probability Tasks 278
 - Additional Common Reasoning Heuristics and Misconceptions* 279
 - Understanding Random Variation* 282
- Conclusion 284
- Vocabulary List 285
- Homework Tasks 285
- Clinical Tasks 290
- Vignette Analysis Activity: Focus on Looking For and Making Use of Structure (CCSS Standard for Mathematical Practice 7) 293
- Resources to Explore 296
- Four-Column Lesson Plans to Help Develop Students' Statistical and Probabilistic Thinking 298

10. Developing Students' Geometric Thinking **307**

- What Is Geometric Thinking? 308
 - Normative Geometric Thinking: Habits of Mind* 308
 - Students' Geometric Thinking: Van Hiele Levels* 311
- Understanding Fundamental Shapes and Their Definitions 314
- Idea for Differentiating Instruction: Discussing Prototypes 315
- Technology Connection: Dynamic Geometry Software, Drawings, and Constructions 315
- Technology Connection: Analyzing Premade Dynamic Constructions 317
- Understanding and Constructing Geometric Proofs 318
 - The Intellectual Need for Deductive Proof* 318

Technology Connection: Using DGEs for Proof Activities	319
<i>Establishing a Classroom Culture of Proof</i>	321
Geometric Measurement	324
<i>Measuring Length</i>	324
<i>Measuring Area</i>	326
Idea for Differentiating Instruction: Measuring	
Nonrectangular Areas	328
<i>Measuring Volume</i>	329
<i>Measuring Angles</i>	330
Trigonometry	331
Contemporary Topics In Geometry	333
<i>Transformation Geometry</i>	333
<i>Tessellations</i>	334
<i>Fractals And Chaos</i>	335
Conclusion	337
Vocabulary List	337
Homework Tasks	338
Clinical Tasks	339
Vignette Analysis Activity: Focus on CCSS Standards for	
Mathematical Practice 1–8	341
Resources to Explore	343
Four-Column Lesson Plans to Help Develop Students’	
Geometric Thinking	345

11. Developing Students’ Thinking in Advanced Placement Courses

353

What Is Advanced Mathematical Thinking?	354
Fostering Students’ Thinking in AP Calculus	356
<i>The Calculus Reform Movement</i>	356
<i>Students’ Understanding of Limits</i>	357
<i>Students’ Understanding of Derivatives</i>	359
Technology Connection: Examining Local Linearity	360
Developing Flexible Thinking	362
<i>Students’ Understanding of Integrals</i>	364
<i>Summary</i>	369
Fostering Students’ Thinking in AP Statistics	370
<i>The Statistics Reform Movement</i>	370
<i>Theme 1: Exploring Data</i>	371
Reasoning About Correlation and Causation	371
Understanding Correlation Coefficients	372
Technology Connection: Tools for Bivariate Data Analysis	374
<i>Theme 2: Sampling and Experimentation</i>	377
Designing and Conducting Surveys	377
Designing and Conducting Experiments	378
<i>Theme 3: Anticipating Patterns in Random Phenomena</i>	380
Technology Connection: Simulation Software	380
Simulation of Samples Model	382
<i>Theme 4: Statistical Inference</i>	383

Technology Connection: Interpreting Calculator Output for Hypothesis Tests	384
Technology Connection: Interpreting Calculator Output for Confidence Intervals	385
Conclusion	386
Vocabulary List	386
Homework Tasks	387
Clinical Tasks	388
Vignette Analysis Activity: Teaching and Learning AP Calculus	389
Resources to Explore	392
Four-Column Lesson Plans to Help Develop Students' Thinking in AP Calculus	394
Four-Column Lesson Plans to Help Develop Students' Thinking in AP Statistics	399

<i>Appendix A: Common Core State Standards for Mathematical Practice</i>	405
<i>Appendix B: Common Core State Standards Content Standards for Grades 6–8</i>	409
<i>Appendix C: Common Core State Standards Content Standards for High School</i>	417
References	431
Glossary	451
Index	463
About the Author	487
